Fig 13

This diagram illustrates a mechanical drive system, possibly for a printing press. It features a main frame (70) supporting various pulleys and belts. Large pulleys (72, 74, 77) are shown with arrows indicating their rotation. A series of belts (81, 82, 84, 85, 87, 90, 91, 92, 93, 95, 96, 97, 98, 100, 102, 103, 150, 151, 152, 153) connect these pulleys, transmitting motion. The system includes a complex arrangement of structural members (72, 74, 77, 81, 82, 84, 85, 87, 90, 91, 92, 93, 95, 96, 97, 98, 100, 102, 103, 150, 151, 152, 153) and a series of rollers or guides (72, 74, 77, 81, 82, 84, 85, 87, 90, 91, 92, 93, 95, 96, 97, 98, 100, 102, 103, 150, 151, 152, 153) that manage the path of the belts. The overall layout suggests a sophisticated mechanism for controlling the movement of a printing element.
